

United States Senate

COMMITTEE ON FINANCE
WASHINGTON, DC 20510-6200

April 21, 2010

Via Electronic Transmission

Stephen Fitton
Medicaid Director
Michigan Medical Services Administration
State of Michigan
400 South Pine Street
Lansing, MI 48933

Dear Medical Director Fitton:

In the United States, the federal and state governments spend roughly \$317 billion every year on the Medicaid program. As Ranking Member of the Senate Committee on Finance, I have an obligation to ensure that taxpayer dollars are appropriately spent on federal health care programs. Like the Medicare program, Medicaid suffers from systemic weaknesses that lead to fraud, waste, and abuse across the program, resulting in higher costs and less health care to those who are in need. The overutilization of prescription drugs, whether through drug abuse or outright fraud, plays a significant role in the rising cost of our healthcare system. The purpose of this letter is to request information regarding certain outliers in Michigan's Medicaid program and what steps Michigan takes to monitor rates of utilization.

In recent inquiries, I have asked the U.S. Department of Health and Human Services about physicians prescribing mental health drugs at astonishingly high rates. In addition to these concerns, a recent CNN report detailed the increasing abuse of OxyContin, Roxicodone, and Xanax. Specifically, the report described the role some pain management clinics and physicians play in the black market for these drugs. I write today to better ascertain how high rates of both mental health and pain medication utilization are affecting the Medicaid program, as well as how Michigan's rates compare to the national rates.

To that end, please provide charts that list of the top ten Medicaid prescribers of the following drugs for the years 2008 and 2009. For each prescriber, please provide his/her prescriber identifier, and the number of prescriptions written per drug per year, and the total amount billed to Medicaid per drug, separated for each year.

- Abilify;
- Geodon;
- Seroquel;
- Zyprexa;

- Risperdal;
- OxyContin;
- Roxicodone; and
- Xanax.

I thank you in advance for your cooperation and request that you provide the requested documents and written responses by no later than May 5, 2010. In your reply, please format information into a chart like the examples provided below. All formal correspondence should be sent electronically in PDF format to Brian_Downey@finance-rep.senate.gov or via facsimile to (202) 228-2131. Of course should you wish to discuss this matter further, please do not hesitate to contact Christopher Armstrong of my Committee staff at (202) 224-4515.

Sincerely,

A handwritten signature in black ink that reads "Chuck Grassley". The signature is written in a cursive, slightly slanted style.

Charles E. Grassley

DIRECTOR

June 4, 2010

The Honorable Charles E. Grassley
Ranking Member
United States Senate
U.S. Committee on Finance
219 Dirksen Senate Office Building
Washington, DC 20510-6200

Dear Senator Grassley:

The Michigan Medical Services Administration (MSA) would like to thank you and your staff for working with us regarding your information request on April 21, 2010. We appreciate your efforts to confront issues associated with Medicaid fraud and abuse. The MSA has also made great strides on this front that have resulted in significant savings and the adoption of best practices, particularly with regard to prescribing patterns for drugs that treat mental illness.

The Program Integrity Section of the Michigan Department of Community Health (MDCH) is committed to keeping the Medicaid program free from fraud and abuse. Pharmacy claims are routinely audited. This section is alerted when a pharmacy or provider is referred to the MDCH, and preliminary investigations are initiated. This can lead to an audit, a return of money to the department, or referral to the Office of the Attorney General (AG) for further investigation. The MDCH works closely with the AG on issues related to fraud and abuse.

Additionally, the Surveillance and Utilization Review Subsystem (SURS) is a component of a larger data warehouse used by the department. It contains paid claims which analysts use to identify outliers in the system. When a potential outlier is identified, the Program Integrity Section investigates to determine whether the provider or pharmacy is acting appropriately or whether sanctions or further investigation is necessary. The SURS is an effective tool in combating fraud and abuse.

Further, the MDCH launched the Pharmacy Quality Improvement Project (PQIP) in May 2005. It is an educational program that analyzes how medications for mental illness are prescribed to adult and child Medicaid beneficiaries, and identifies prescribing patterns that do not follow accepted evidence-based treatment guidelines.

In the PQIP, physicians are provided with educational materials as well as opportunities for peer-to-peer consultations. Goals of the PQIP include improving continuity of care, eliminating redundant treatments, coordinating care among providers, and decreasing risks associated with inappropriate use of prescription drugs.

The project is a collaborative effort involving the MDCH Mental Health and Substance Abuse Administration and the MSA, in partnership with Comprehensive NeuroScience, Inc (CNS) of White Plains NY. The MDCH Mental Health Advisory Committee, composed of medical directors from the Medicaid Health Plans and the Prepaid Inpatient Health Plans, serves as an advisor to the project.

The State considers this to be a very successful initiative. An impact analysis was performed that compared claims cost before and after a PQIP intervention between May 2005 and January 2006. The results showed a 22 percent reduction in claims and a 21 percent reduction in costs. During that six-month intervention period the MDCH found the program produced cost savings of approximately \$1.7 million. In February 2006, opiates were added to the catalogue of drugs monitored by PQIP.

The MSA is keenly aware of the impact provider education can have on prescribing patterns. We have endeavored to keep the PQIP as supportive to doctors as possible, and we've seen great success. In light of that, the department harbors great concern that the information requested, the top prescribers of certain name brand drugs, could easily be misinterpreted.

The top prescribers of these types of atypical antipsychotic drugs are often psychiatrists who coordinate care for the chronically mentally ill. In no way does it imply the doctor is not following evidence-based practice. High rates of prescribing can be related to a number of factors. Some of those factors include, the size of the population served, the severity of the illness in the population served, and higher concentrations of Medicaid patients. Furthermore, more complicated cases are often referred to more experienced doctors, thereby raising their drug-prescribing profile. The State maintains that releasing the names of these providers will not point to outliers in the system, and could potentially lead to false accusations against well-meaning and experienced physicians.

For these reasons, the State can not, in good conscience, release the names of the physicians who fit this profile. We do, however, wish to be as cooperative as possible and will provide data with the names of the providers de-identified. Unfortunately, we are not able to provide the total number of prescriptions, but instead the enclosed attachment provides the total numbers of beneficiaries for which these prescriptions have been written.

Sincerely,

A handwritten signature in black ink, appearing to read "Stephen Fitton", is written over a horizontal line.

Stephen Fitton, Director
Medical Services Administration

Stephen Fitton
Director, Medical Services Administration
Department of Community Health
Capitol Commons
400 South Pine
Lansing, Michigan 48933

Dear Director Fitton,

On June 4, 2010, your office provided my staff with data regarding the top ten prescribers of several pain management and mental health drugs in your state. These types of drugs have addictive properties, and the potential for fraud and abuse by prescribers and patients is extremely high. Mental health drugs continue to be prescribed at astounding rates and pain management clinics are turning into a hotbed for black market painkillers. When these drugs are prescribed to Medicaid patients, it is the American people who pay the price for over-prescription, abuse, and fraud.

After an extensive review of prescribing habits of the serial prescribers of pain and mental health drugs in your state, I have concerns about the oversight and enforcement of Medicaid abuse in your state. While I am sensitive to concerns about the potential for misinterpretation of the data you provided, the numbers themselves are quite shocking.

For example, the top prescriber of Seroquel wrote nearly triple the number of prescriptions in 2009 than the second top prescriber. This outlier is consistent with

several of the antipsychotic drugs—with the top prescribers writing double or triple the number of prescriptions as the other prescribers on the list.

It is my intention to ensure that each of the states is adequately monitoring, investigating, and stopping fraud and over-prescription of these types of drugs. Therefore, please provide answers to the following questions:

1. What action, if any, has your agency taken with respect to the prescribers identified to the Committee?
2. If there has been no action taken with respect to these prescribers, please explain why not.
3. Please identify which of the providers identified to the Committee remain eligible to bill the Medicaid Program.
4. Please provide the 2010 and 2011 numbers for the top prescribers of these same drugs.
5. Has each of these prescribers been cross-checked for complaints or misconduct with the state medical board or the National Practitioner Data Bank? If not, do you plan to do so?
6. Have any of the prescribers identified to this Committee been referred to your state medical board?
7. Is there any system set up in your state to identify and monitor excessive prescription writing? If not, why not?
8. Have you received any training or guidance from the Centers for Medicare and Medicaid Studies to help identify potential issues with prescription drugs?
9. Does your state maintain a database of all prescribed controlled-substances? If so, what entities have access to it?
10. Does your state have any point-of-sale restrictions related to maximum units, prior authorization, therapeutic duplication, or early refill? If not, why not?
11. Were any of these top ten prescribers identified in the federal-mandated Drug Utilization Review or CMS-base retrospective reviews?
12. Does your state have any programs in place to educate providers about the prescription of antipsychotics to children and adolescents?

Thank you in advance for your cooperation and attention in this matter. When responding to this letter, please number your answers in accordance with my questions. I would appreciate a response by February 13, 2012. If you have any questions, please do not hesitate to contact Erika Smith of my staff at (202) 224-5225.

Sincerely,

A handwritten signature in blue ink that reads "Chuck Grassley". The signature is written in a cursive, flowing style.

Charles E. Grassley
Ranking Member
Committee on the Judiciary

RICK SNYDER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF COMMUNITY HEALTH
LANSING

OLGA DAZZO
DIRECTOR

February 28, 2012

The Honorable Charles E. Grassley
Ranking Member
United States Senate
Committee on Finance
Washington, DC 20510-6200

Dear Senator Grassley:

In response to your January 23, 2012 letter requesting Michigan Medicaid prescribing information, the Michigan Department of Community Health (MDCH) would like to address your concerns.

We appreciate your efforts to confront issues associated with Medicaid fraud and waste. The MDCH Medical Services Administration (MSA) has made great strides on this front that have resulted in significant savings and the adoption of best practices, particularly with regard to prescribing patterns for drugs that treat mental illness.

In addition, the Office of Health Services Inspector General (OHSIG) is committed to keeping the Michigan Medicaid program free from fraud and abuse. The OHSIG regularly reviews pharmacy claims post-payment via on-site audits, desk audits, and concurrent audits.

In an effort to clearly respond to the questions raised in your January 23, 2012 letter, we have provided MDCH's response to each of the questions below.

1. What action, if any, has your agency taken with respect to the prescribers identified to the Committee?

Identified prescribers were sent letters by the Drug Utilization Review Board and the Michigan Pharmacy Quality Improvement Project, which offered a peer-to-peer consultation with the MDCH chief psychiatrist.

2. If there has been no action taken with respect to these prescribers, please explain why not.

Please see our response to question 1.

3. Please identify which of the providers identified to the Committee remain eligible to bill the Medicaid Program.

Only providers that comply with all licensing laws and regulations applicable to the provider's practice or business in Michigan and who are not currently excluded from participating in Medicaid by State or Federal sanction are eligible to prescribe to Medicaid beneficiaries. The appropriate action has been taken for any identified non-compliant or excluded providers.

4. Please provide the 2010 and 2011 numbers for the top prescribers of these same drugs.

Please see the 2010 and 2011 data enclosed with this response.

5. Has each of these prescribers been cross-checked for complaints or misconduct with the state medical board or the National Practitioner Data Bank? If not, do you plan to do so?

The State of Michigan requires that Medicaid providers comply with all licensing laws and regulations applicable to the provider's practice or business. Providers sanctioned by State or Federal laws or regulations are terminated from participation in the Michigan Medicaid Program.

6. Have any of the prescribers identified to this Committee been referred to your state medical board?

Necessary action has been taken for identified providers.

7. Is there any system set up in your state to identify and monitor excessive prescription writing? If not, why not?

The State of Michigan monitors excessive prescription writing through the following:

- *Michigan Automated Prescription System (MAPS)*
- *Drug Utilization Board (DUR)*
- *Michigan Pharmacy Quality Improvement Project (PQIP) (This program ended in December 2010 and its duties were transferred to the DUR Board.)*
- *Enhanced Med Project (to be implemented in April 2012).*

8. Have you received any training or guidance from the Centers for Medicare and Medicaid Studies to help identify potential issues with prescription drugs?

The State of Michigan has access to all the relevant updates on the CMS website. However, no CMS training opportunities have been identified to help identify potential issues with prescription drugs.

9. Does your state maintain a database of all prescribed controlled-substances? If so, what entities have access to it?

The Michigan Automated Prescription System (MAPS) is the prescription monitoring program for the State of Michigan. It is used to identify and prevent drug diversion at the prescriber, pharmacy and patient levels by collecting Schedule 2-5 controlled substance prescriptions dispensed by pharmacies and practitioners. This enables the practitioners to determine whether patients are receiving controlled substances from other providers and to assist in the prevention of prescription drug abuse. Prescription data collected by pharmacies and dispensing practitioners is stored on a secure central database within the Department of Licensing and Regulatory Affairs. Only those persons authorized by Section 333.7333a of the Michigan Public Health Code are allowed access to the information contained in the MAPS database, which includes health professionals and law enforcement agencies. Please refer to the following link to the Michigan Public Health Code.

www.legislature.mi.gov >> Michigan Compiled Law (MCL) Search for 333.7333a

10. Does your state have any point-of-sale restrictions related to maximum units, prior authorization, therapeutic duplication, or early refill? If not, why not?

Prospective Drug Utilization Review (ProDUR) is actively used by Michigan Medicaid. ProDUR edits are used for point-of-sale restrictions. They are required before each prescription is delivered to a Medicaid beneficiary. The pharmacist reviews a prescription for therapeutic duplication, drug-disease contraindications, drug-drug interactions, incorrect dosage or duration of treatment, drug allergies, clinical abuse/misuse, under-utilization or over-utilization. Incoming claims are compared to a beneficiary's pharmacy claims history file to detect potential therapeutic problems. ProDUR

screening is the responsibility of each Medicaid participating pharmacy and is a requirement of Medicaid participation. For early refills, pharmacies must obtain prior authorization.

11. Were any of these top ten prescribers identified in the federal-mandated Drug Utilization Review or CMS-base retrospective reviews?

Prescribers were identified and contacted by the DUR board/PQIP.

12. Does your state have any programs in place to educate providers about the prescription of antipsychotics to children and adolescents?

This information was previously given to providers through the PQIP and is currently provided through the DUR Board.

Sincerely,

A handwritten signature in black ink, appearing to read "Stephen Fitton". The signature is fluid and cursive, with the first name "Stephen" and last name "Fitton" clearly distinguishable.

Stephen Fitton, Director
Medical Services Administration
